Mid-level Fullstack Developer

SUMMARY

- 3 years of experience in the field of front-end and back-end Development.
- **Web Application Development:** Proficient in creating web applications using React (JavaScript/TypeScript), ensuring dynamic and user-friendly interfaces.
- **REST API Development:** Skilled in building RESTful APIs with Node.js (JavaScript/TypeScript), providing efficient communication between applications.
- **Cloud Services:** Experienced using AWS and GCP's core services. Including AWS EC2, AWS EBS, AWS SQS, AWS SNS, AWS RDS. Also Google App Engine, Pub/Sub and Firebase.

PROJECTS

- **Fingermark (Worldwide cloud-based software platform that integrates the greatest fast food companies) | 2023:** development and maintenance of B2B integrations. Design and creation of architectures involving monitoring systems worldwide. Enhance of legacy codes which helped to improve the performance and efficiency of Fingermark's.
- **Infleux (Adtech) | 2022:** development and maintenance of a web app, REST API service and a React Native app. (1) Created a push notification system using AWS SNS, MongoDB, and React Native. (2) Developed deployment pipelines for React apps and Node.js services (3) Improved feature updates a mobile application using CodePush. (4) Enhanced cloud service cost by 8% by making tests using different EC2 instance types, configuring load balancers and reducing CI/CD pipeline amount of time (5) Maintained a real time stream of conversions and clicks using Node.js, AWS Athena and AWS RDS (6) Development of a Node.js cronjob webscraper to collect data using AWS SQS
- **MyWell (Digital marketing agency) | 2021:** Worked on the development of landing pages using WordPress, PHP and JavaScript (jQuery). (1) Improved page speed and enhanced the performance of several landing pages (2) Optimized the user experience and conversion rates for landing pages by implementing responsive design principles.

PROFESSIONAL EXPERIENCE

- **Fingermark**

Period: mar/2023 – Present

Position: Fullstack developer

- **Infleux**

Period: sep/2022 – feb/2023

Position: Site Reliability Engineer

Period: aug/2021 – sep/2022

Position: Fullstack developer

- **My Well**

Period: sep/2020 – jul/2021

Position: Front-end developer

DESCRIPTION

- **Fingermark:** Responsible for the development and maintenance of B2B integrations using TypeScript, Node.js and .NET. Also for designing and creating architectures involving worldwide systems using Google Cloud Services such as Google App Engine, Firebase and Pub/Sub. Additionally, enhanced legacy codes to improve Fingermark's performance and operational efficiency.

- **Infleux:** Responsible for the end-to-end development and ongoing maintenance of a product consisting of a web application, monolithic REST API and a mobile application, all constructed with TypeScript. The web application used React.js, the REST API used Node.js and the mobile app was built using React Native. In addition to my development responsibilities, I diligently created alerts on AWS to ensure the continuous and secure operation of the product. My role extended also to contributing to design and implementation of new features and functionalities.
- **MyWell:** Responsible for the management of landing pages, the creation and optimization of these webpages. Using JavaScript, jQuery, WordPress, and PHP to make these pages.
